

Beacon Industries, Inc.

ERP IT Manager (Information Technology Project Manager)

Job Description

Beacon Industries, Inc. is a diversified manufacturer of precision-machined, tight-tolerance structural and rotor products serving the Aerospace, Power Generation, and Turbo-Machinery Industries with locations in Bloomfield and Newington, CT. We are known for being a world class CNC turning and (5 axis) milling capability. Our products meet the most exacting standards of the aerospace industry who, because of the nature of their products, are among the most exacting in the world. We are looking for an ERP IT Manager to join our growing IT team.

As an ERP IT Manager, you will be an integral part of our information technology team and will lead and champion the ERP consolidation project. Your experience with VISUAL Manufacturing or Epicor Vantage ERP System will ensure your success in this dynamic management role. If you are looking for an opportunity to grow your career in IT with a growing company and you meet our qualifications, we want to talk to you! Apply today!

ERP IT Manager (Information Technology Project Manager / Manufacturing)

Job Responsibilities

As an ERP IT Manager, you will be responsible for taking over and championing the information technology infrastructure and ERP consolidation project as an integral component of our comprehensive operational and business systems consolidation project.

Additional responsibilities of the ERP IT Manager include:

- Performing program and project planning and management, infrastructure upgrade and maintenance
- Performing desktop and laptop upgrade and maintenance
- Training employees
- Performing back-up and recovery data storage solutions, data migration between ERP systems
- Creating business and user specific reports
- Ensuring the overall optimization for Beacon's business processes
- Managing the entire Information Technology area
- Determining, recommending, and justifying the procurement of all hardware, software, telecommunications, and security equipment
- Establishing and implementing network policies and procedures in compliance with industry best practices, AS9100, Customer compliance requirements, Federal Law, and Beacon requirements
- Monitoring user problems and ensuring optimum user-system and software performance

ERP IT Manager (Information Technology Project Manager / Manufacturing)

Job Requirements

Successful candidates for the ERP IT Manager role have an intimate working understanding of Beacon's manufacturing, quality assurance, engineering, and financial business processes and procedures, and the ability and willingness to support these processes at all levels.

Additional requirements of the ERP IT Manager role include:

- Bachelor's Degree in Computer Science, Information Systems, or related IT field
- 5 years' experience with the following skills: SQL Server & Statements, ERP implementation experience, Server & Network Infrastructure selection and implementation, Virtual/Cloud Networking, VoIP, Telephony and Communications systems, Wireless Networks, Mobile Devices, Microsoft Excel, Access, and Crystal Report Writing
- 3 years' experience on either VISUAL Manufacturing or Epicor Vantage ERP System with Windows Server Active Directory and Microsoft Exchange experience
- Network Certification and experience within a manufacturing environment with direct operational support background, *preferred*
